2011 WORKSHOPS OF

Chicago Medical Society
515 North Dearborn Street
Chicago, Illinois 60654-4302

Register Online:

www.cmsdocs.org

Topics Include:

OSHA requires that all healthcare employers maintain a written Exposure Control Plan. The plan must include a risk analysis, Hepatitis B vaccinations, follow-up procedures, an evaluation of safer sharps and training. The 2-hour update includes the following topics: Health Care Worker Safety and Health, Common Hazards from Bloodborne Pathogens Associated with Medical & Dental Offices, Compliance with OSHA Regulations, Emerging Infectious Diseases and Q & A. OSHA requires that your plan be reviewed; that the newest technology be reviewed, and that training is repeated on an annual basis.

CME Disclosures, Accreditation &

Designation: The planning members of the

Chicago Medical Society's CME Subcommittee on

Joint Sponsorship disclosed the following: Vickie

Becker, MD, Chairman, Roger L. Rodrigues, MD, Bapu P.

Arekapudi, MD, Marella L. Hanumadass, MD, Vijay V.

Yeldandi, MD, Course Director, and Cecilia Merino, Director of

Education, do not have any relevant financial relationships with

2011 OSHA Training: Bloodborne Pathogens & Beyond

WHO SHOULD ATTEND?

OSHA requires annual training for all health care workers with potential occupational exposure to bloodborne pathogens. The following groups, with both clinical and non-clinical responsibilities, would benefit if their scope of professional practice involves managing a healthcare office, addressing HR issues, providing staff training, and performing administrative duties: Physicians, Dentists, Nurses, Dental Hygienists, and Physician/Dental Assistants.

Healthcare office managers with non-clinical responsibilities that are in charge of staff training and designated as the primary contacts for any in-house exposure incidents would also benefit from this training. Attend the 2-hour training course, update your exposure control plan, and satisfy most of your annual OSHA regulations today!

LEARNING STRATEGIES:

All workshops are taught by specialists in exposure control. The course is designed for clinicians and their staff. At the conclusion of this activity, participants should be able to:

- * Implement a training program for healthcare employees that may be exposed to bloodborne pathogens.
- * Identify appropriate personal protective equipment (PPE).
- * Develop an emergency response plan.
- * Create a written exposure control plan for healthcare workers assigned as first-aid providers.
- * Develop a strategy to prevent the spread of pandemic flu within their practice.

Speaker: Sukhvir Kaur, Compliance Assistance Specialist, OSHA-Chicago North Office. Ms. Kaur does not have any relevant financial relationships with commercial interests to disclose.

This activity has no commercial support.
